

Fixings

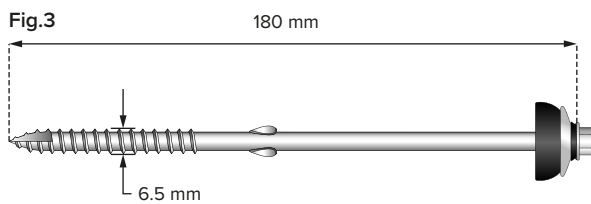

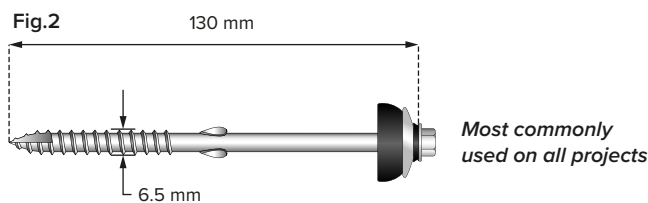

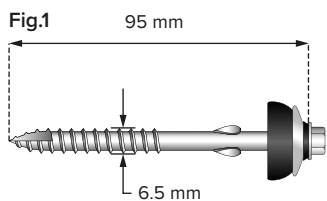

All fixings supplied by Briarwood and are our recommended fixings

Briarwood is a trusted provider of high-quality fixings and caps that perfectly complement any fibre cement roofing project. Whether you're installing a new roof or conducting repairs, Briarwood offers a comprehensive range of fixings designed to meet the specific needs of your project. With their extensive expertise in the industry, Briarwood ensures that their recommended fixings are ideal for use across all fibre cement projects utilizing EUROSIX.

One notable feature of Briarwood's fixings is their construction from carbon steel. This material offers exceptional durability and strength, ensuring long-lasting performance and reliability in demanding roofing applications. Carbon steel fixings provide excellent resistance to corrosion and weathering, making them suitable for outdoor use in various climates and environments.

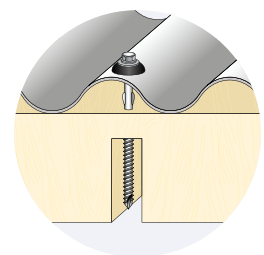

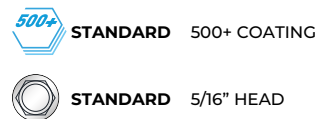

Briarwood's fixings come in a range of sizes to accommodate different timber purlin dimensions. The available sizes include 95 mm, 130 mm, and 180 mm, allowing you to select the appropriate length based on the specific requirements of your timber purlins. This versatility ensures that the fixings provide secure and stable connections, promoting the overall structural integrity of the fibre cement roofing system.

When you choose Briarwood fixings for your fibre cement roofing project, you can have confidence in their quality, compatibility, and performance. With their commitment to excellence and a comprehensive range of products, Briarwood is a reliable partner for all your fixings and caps needs in the realm of fibre cement roofing.

Fixing positions

Fixing positions into the sheeting should be into the first and last full corrugations. There should only be 2 fixings per purlin, with a maximum of 6 fixings per sheet.

TIMBER FIXINGS

Drawing	Dimensions	Material	Application
Fig.1	6,5 x 95 mm	Carbon steel	Sheet materials
Fig.2	6,5 x 130 mm	Carbon steel	Any timber size
Fig.3	6,5 x 180 mm	Carbon steel	Up to 9" timber
